

1 Assume that line l and m are parallel. What are the relationships between the given angles?

- $\angle A$ and $\angle C$
- $\angle A$ and $\angle G$
- $\angle H$ and $\angle C$
- $\angle B$ and $\angle H$
- $\angle B$ and $\angle F$
- $\angle E$ and $\angle C$
- $\angle B$ and $\angle E$
- $\angle C$ and $\angle G$
- $\angle E$ and $\angle C$
- $\angle A$ and $\angle E$

2

- $\angle A$ and $\angle C$
- $\angle A$ and $\angle G$
- $\angle H$ and $\angle C$
- $\angle F$ and $\angle H$
- $\angle B$ and $\angle F$
- $\angle E$ and $\angle G$
- $\angle B$ and $\angle D$
- $\angle C$ and $\angle A$
- $\angle D$ and $\angle C$
- $\angle D$ and $\angle B$

3

- $\angle A$ and $\angle G$
- $\angle C$ and $\angle G$
- $\angle H$ and $\angle C$
- $\angle B$ and $\angle H$
- $\angle B$ and $\angle A$
- $\angle E$ and $\angle C$
- $\angle B$ and $\angle D$
- $\angle C$ and $\angle G$
- $\angle E$ and $\angle H$
- $\angle D$ and $\angle F$
